## We are Crem

CREM was born in the 1980s with a simple but powerful vision: to create professional coffee machines that combine premium performance with smart, accessible design. We are not a brand for the few—we are the smart choice for professionals who value clarity, trust, and results.

Our history is defined by focus, quality, and strong execution. We have grown by doing more with less, staying committed to real-world needs. This approach led us to join Welbilt and Ali Group, resulting in global recognition for a company built to last. Today, we remain one team with one story.

With global roots and an agile mindset, we operate across markets while keeping a hands-on, humble, and action-driven spirit. Rooted in Gandia Spain, we are shaped by real work and real people, carrying a Mediterranean warmth that keeps us open, human, and closely connected to the communities we serve.

We invest where it matters: engineering, design, user experience, and reliability. That's why our machines are stylish, robust, and high-performing at an accessible Price point. From major international brands to independent coffee shops, we support professionals of every scale. If you care about coffee, we're with you. We are CREM.
