# ILVE: the company

Cooking with love means improving the quality of life: an important promise that ILVE always keeps. The collection addresses people's needs in a tangible, consistent and elegant way. From the appeal of classic styles to new design trends, ILVE designs appliances that decorate the kitchen, paying the utmost attention to technology and details.

# Reliability: a value that lasts over time.

ILVE appliances are the product of the company's passion for their craft, their enthusiasm in always tackling new design and technical challenges, and the continuous search for excellence. These sentiments give life to perfect and unique instruments, designed to give joy and satisfaction to those who truly love cooking. Qualities that shine through every aesthetic and technical detail. Although there's only one passion for cooking, personal interior decoration tastes may vary. That is why ilve collections have different styles, but all share one goal: to offer cutting-edge solutions, to make cooking a daily pleasure.

# Range cookers

# Majestic

Majestic range cookers are appliances that decorate the home thanks to their rounded shapes forged in pure steel with painstakingly made details. They are true gems of professionalism, designed for the kitchen in your home. They are available in a range of selected colours or in RAL Classic shades on request, combined with fine metallic finishes.

Offered in a wide range of sizes (from 70 cm to 150 cm), they offer multiple set-up possibilities. The oven can be in sizes up to 90 cm or double in those up to 150 cm; with touch control and temperature up to 320°C. There are five hob configurations to choose from: dual gas burners, coupe de feu or fry top are some of the options available for the gas version, while the total induction version is available up to the 120 cm model with 7 cooking zones and bridge function.

# Nostalgie

Nostalgie range cookers integrate highly professional technologies and excellent materials with a classic style that is always inspiring. Undisputed protagonists of the kitchen, they offer a complete choice of sizes (from 60 cm to 150 cm) and various configurations: you can choose the flush-top induction up to 7 cooking zones with bridge function for 120 cm version, single or double oven, standard colours or RAL colours on request, various finishes and accessories. Only available as an option for the Nostalgie collection, Noblesse Coppers are more than just a detail: they are a fine design feature that Coppers the front panels, matching the metallic finishes of the handles and knobs. The solid door inspired by the past is another option that elegantly enriches the style of Nostalgie.

# Professional Plus

The Professional Plus range cookers are inspired by the kitchens of the best restaurants, bringing robustness, ergonomics and operability to the domestic space.

They offer various set up options, from double ovens to gas or induction hobs.

Available gas hobs range from 60 cm up to 150 cm with up to 8 burners and can be integrated with coup de feu and fry top. Induction hobs are flush-mounted, from 90 cm up to 120 cm: the latter version is equipped with no less than 7 cooking zones and the bridge function.

The option of choosing different sizes, standard colours or upon request, the option of RAL colours, and metallic finishes, allows it to blend perfectly in any interior.

Dual gas burners with power up to 5 kW optional

Total Black brass flame spreader with non-stick nanotechnological treatment

Highly specialised hobs.

Cast iron pan support reducer

EA6051003000000 € 33,00

Aspiration hobs installation mode

Filtering mode installation

The installation in filtering mode allows you to filter the fumes from fats and cooking odors and reintroduce the filtered air into the home, through specific pipes and grilles. It is the installation method most attentive to energy saving, as all the air is recycled, avoiding the transfer of heat outside.

Filtering with extraction in plumbing space installation

Extracting mode installation

This particular method is in fact an installation in the filtering version and shares all the operating characteristics with it, but in this case the air is evacuated into the plumbing space present in the rear area of the kitchen base units instead of being ducted somewhere else.

Installation in extraction mode allows the aspiration hob to be installed with fume extraction outside the home; in this mode, the air outlet of the product must be connected to the outlet hole of the house or to the appropriate ventilation channel, using specific pipes.

Kitchen plinth h. 10-15

Filtering installation kit

RFKTIPLH10 Complete pipes kit	€ 166,00
